

Introduction

Children can benefit educationally and emotionally, increase their understanding of responsibility and develop empathy and nurturing skills through contact with a dog.

In addition to these benefits, children take great enjoyment from interaction with a dog. Appendix B sets out further reasons for why the school feels it will be beneficial to have a school dog.

Is there a risk in bringing a dog into a school environment?

Of course there is, although there are a variety of accidents which can happen within the school environment which far exceed the number of injuries or incidents caused by a dog. Therefore, it is just another risk that needs to be managed.

School Policy

The dog will be owned by Mrs Sanchez Daviu and all costs paid by her. The dog is a miniature dachshund chosen for its size, mild, loving temperament and non-moulting coat. Mrs Sanchez Daviu will be responsible for Hattie's regular visits to the vets, injections and vaccinations.

The Chair of Governors, Executive Head and the Head Teacher have agreed that the school can have a dog.

Staff have been informed, through staff briefing, that the school will have a dog. Pupils were surveyed on three separate occasions with regard to having a school dog. Parents and carers have been informed by letter and newsletter that a school dog will be trialed in school and were given the opportunity to speak with Mrs Sanchez Daviu. At the start of each academic year there will be lessons around the school dog and parents will be given an opportunity to speak to the head with regards to the school dog. Mrs Sanchez Daviu has produced a risk assessment and this will be reviewed annually. The risk assessment is attached as Appendix A

In the event of an emergency evacuation the adult supporting Hattie will accompany her to the Fire Evacuation point.

Staff, visitors and students known to have allergic reactions to dogs must remain at a manageable distance. Parents are able to inform the school of any allergies on admission and will be told in the admissions process.

If the dog is unwell, Hattie will not be allowed into school.

Parents and carers will have an update at the end of each term as to what Hattie has been up to and where she is with her training.

The dog will normally be kept on a lead and harness until fully trained when moving between classrooms or on a walk and will be under the full control and

supervision of an adult.

There may be occasions when the dog is working off lead, but this will only happen in an enclosed space and under the control of an adult. Before removing the lead, all present will be consulted.

During Talk Time, all children will be asked if they are OK with Hattie sitting by them.

When Hattie is ready to access the classroom, or work with small groups, parents and carers will be informed. Areas where Hattie is working with a small group or in class will be clearly signposted to alert others that she is present.

Students must never be left alone with the dog and there must be appropriate adult supervision at all times when the dog is present with students.

Students should be reminded of what is appropriate behaviour around the dog. Students should remain calm around the dog. They should not make sudden movements and must never stare into a dog's eyes as this could be threatening for the dog. Students should not put their face near a dog and should always approach it standing up. Students should never go near or disturb the dog that is sleeping or eating. Students must not be allowed to play too roughly with the dog. Students need to ask to stroke Hattie and should never place their hand over Hattie's face, but allow her to sniff their hand first. As Hattie is a small dog, she may be raised to let a child stroke her, but this will always be by a trusted adult and always still close to the ground to allow her to be below child-level.

If the dog is surrounded by a large number of students, the dog could become nervous and agitated. Therefore, the adult in charge of the dog must ensure that s/he monitors the situation.

Dogs express their feelings through their body language. Growling or baring of teeth indicate that the dog is feeling angry or threatened. Flattened ears, tail lowered or between their legs, hiding behind their owner, whining or growling are signs that the dog is frightened or nervous. If the dog is displaying any of these warning signs he should be immediately removed from that particular situation or environment.

Children should not feed or eat close to the dogs.

Children should always wash their hands after handling a dog. As a school we will provide anti-bacterial gel and/or a handwashing procedure.

Any dog foul will be cleaned immediately and disposed of appropriately by an adult.

Roles and Responsibilities

The Governing Body has a responsibility to ensure that the school has a written policy for dogs in School.

The Headteacher is responsible for implementing this policy.

Teachers and staff and children are required to abide by this policy.

The Health and Safety Officer is responsible for providing information, advice and guidance as and when required.

Policy written: Sept 2022

Policy to be reviewed: Sept 2023

Appendix A Risk Assessment

Introduction:

The value of pet ‘therapy’ is widely accepted as a powerful aid to stimulation and communication. Studies have shown that the presence of companion animals can improve the well-being of children and lower the rate of anxiety, simply by making the environment happier, more enjoyable and less forbidding. The team at Kingswood Primary School have been considering obtaining a dog as a school therapy pet for some time and the decision was made in March 2022 to go ahead with the project.

The rationale behind this decision was as follows:

- For the school to have a pet that was able to live as naturally as conditions would allow.
- For the animal to be properly cared for outside of the school day.
- To have a pet that the children could interact with and also be of benefit to the children’s social and emotional development.

It is accepted that interacting with animals is not appropriate for all children but for some it has the potential to provide many positive benefits. Any parent who does not want their child to interact with Hattie is invited to meet with Mrs Sanchez Daviu and inform her of their wishes. There are no diseases associated with the puppy as her vet will be responsible for vaccinations, including rabies and completing regular health checks and necessary treatment. A copy of Hattie’s health records will be updated and kept in school. Hattie will also be insured by Mrs Sanchez Daviu.

The risk assessment below is a working document and will be checked annually by key staff and the governing body.

Hazard	Risk	Risk 1 - 5	Controls in place	Review date
Dog getting over excited when interacting with children.	Child knocked to the ground.	1	The dog will always be in the care of a responsible adult and will never be allowed to roam freely around the school premises.	
	Dog jumps up to child	1	Children will not be left unsupervised with the dog.	
	Child scratched by dog.	3	The dog will always be on a lead or carried when she is not in the school office while the children are in school.	
	Child bitten by dog.	3	Pupils have been and will continue to be taught about the consequences of their actions/taught positive dog interaction strategies.	
			Education of this nature is continually	

			<p>given to children, and often to the whole school through assemblies and PSHE sessions.</p> <p>Pupils will be taught what to do to prevent the dog from chasing them.</p> <p>The dog will undergo formal training from the age of 11 months with an experienced dog trainer. Selected children will be part of this process when and if needed, once Hattie starts Therapy training.</p> <p>Risk of scratching and biting will reduce, and the risk assessment will be reviewed as she progresses through her weekly training.</p> <p>All staff will have been introduced to the dog and expectations of having a school dog.</p> <p>The dog will attend the vets regularly to ensure she is in good health and that her claws are kept short.</p>	
The dog causing allergies.	Children or staff have allergic reactions	1	<p>Parents have been asked to inform the school of any known allergies before the introduction of the dog to the school.</p> <p>A list of any children/staff who should not interact with the dog will kept in school.</p> <p>The children will have the opportunity to interact with the dog as they wish and those with allergies will be able to opt out of interaction.</p> <p>Children will be taught to wash their hands after active participation with the dog</p>	
Children getting germs from the dog.	Children or staff will contract diseases that can be carried by dogs.	1	<p>Should the dog defecate on the school site a member of staff will clear this up immediately and dispose of it in a safe way.</p> <p>She will be trained to toilet in an area of the grounds that children have limited access to. The area will be disinfected as required.</p> <p>All immunisations are kept up to date in accordance with the European Pet</p>	

			<p>Passport Scheme and a record will be kept of this.</p> <p>Flea and tick treatment is carried out at monthly intervals. Worming treatment is carried out every 3 months.</p> <p>The dog will not be allowed in the school dining hall at mealtimes; and never in the food preparation area.</p>	
Financial cost of the dog's upkeep.	School unable to afford the ongoing cost of the Lola's day to day upkeep or medical bills.	1	<p>The dog is ultimately the responsibility of Mrs Sanchez Daviu both in a well-being and financial aspect.</p> <p>Hattie will be insured by the school, for Public Liability Insurance and Mrs Sanchez Daviu..</p> <p>All vets costs are covered by Hattie</p> <p>The Puppy Shrink are providing puppy training and Therapy Dog Training UK are supporting Hattie's Therapy Training.</p>	

KEY: 1- Low risk

2

3 -Medium risk of injury

4

5-High risk of injury

Appendix B**Reasons to have a dog in school****Behaviour**

Behaviour problems occur in school and these can interfere with learning. Some schools are using dogs to improve behaviour problems by promoting positive behaviour in students. In a controlled study, students were found to have fewer disciplinary referrals in schools with a dog than schools without. Students' behaviour improved toward teachers, and students also showed more confidence and responsibility. Additionally, parents reported that children seemed more interested in school as a result of having a dog at school.

Attendance

Children can be encouraged back into school using caring for a dog as an incentive. A dog can also help children to cross the threshold when anxious.

Social Development

Dogs in school offer an opportunity for improving social development. They are especially useful for teaching students social skills and responsibility. Specifically, with a dog in the classroom, students have the opportunity to learn how to care for the animal. This includes walking and grooming. Researchers report that involving students in the daily care of classroom dogs is a positive experience, promoting their own daily care. The students also learn about responsibility, caring and sharing when helping each other take care of a dog at school.

As a reward

Dogs will be gentle and living, but at the same time full of fun and enjoyment for the students. Those students who have performed incredibly well during the week or those who have made progress in a certain subject, or those who have achieved tasks set for them, may be rewarded with spending time during lunch or break to interact with these dogs. Walking, grooming, playing and training are some of the responsibilities students will be allowed to undertake. It has been proved that working and playing with a dog improves children's social skills and self-esteem. Support Dogs can work with students on a one to one basis and will especially help those students who have been bullied abused, going through upsetting/difficult times or even scared/phobic of dogs. The dog will bring much joy and help to all the students they meet and are happy to provide plenty of hugs to the students they are spending time with. Students who struggle with social interaction can find a reassuring friend in a dog.

Reading

Reading programmes with dogs are doing wonders for some students. Children who might be embarrassed to read aloud to the class or even adults are likely to be less scared to read to a dog. "It might be less stressful for a child to read aloud to a dog than to a teacher or a peer. After all, a dog won't judge or correct you." Dogs are used to encourage struggling readers to practise reading aloud. With the presence of a "calm and well-trained dog," students find social support and peer interaction. Dogs are incredibly calm and happy to have students read to them or join a group of children in the library whilst they are having a book reading session. Dogs give unconditional acceptance, as they are non-judgmental, which is especially crucial to struggling, emerging readers.

School Dog Policy and Risk Assessment

The dogs also provide confidence to children as they do not make fun of them when they read, but above all they make amazing listeners, providing the children with a sense of comfort and love. Research has proved that students who read to dogs show an increase in reading levels, word recognition, a higher desire to read and write, and an increase in interpersonal skills among the students they mix with. Bullying can be a problem in all schools with students anxious about school for fear of taunting and abuse. But in some schools dogs are making a difference in the fight against bullies. Researchers report that students can identify with animals, and with empathy for the dog, can better understand how classmates may feel. It was found that violent behaviour in participation students declined by 55%, and general aggression went down 62%
