24th April 2024

Dear Parent and Carers

Welcome to Term 5

This term our theme is Water. We will study why it is important and how we use it as well as learning the significant bodies of water and locating them on the world map using 4 and 6 figure grid references. We have already had some superb pieces of homework. Thank you for your support.

Our class book is another story written by Emma Carroll called "The Tale of Truthwater Lake" and is linked to water and global warming. Reading another book by her allows us to discuss different stories by the same author. Our literacy will as ever be inspired by the class book. Reading comprehension texts will be water themed.

In numeracy, we have been working on the various ways to handle data as well as revising decimals, percentages and fractions. Our computing topic is spreadsheets so we will also be learning about money, shopping budgets and formulas. As usual we will be working on arithmetic methods.

Science is Living things and their habitats and includes classification.

P.E. is athletics so fingers crossed for fair weather. The days are Monday and Thursday.

We are designing and making pop-up books for Chestnut Class in Design and Technology. This topic also involves story writing, settings and characters.

Kind regards

Mrs Phillips
